SUMMARY

Computer Science graduate with hands-on experience in data analysis through academic and bootcamp projects. Skilled in Python, Pandas, SQL, and Excel for cleaning, validating, and analyzing structured data to support reporting and decision-making. Experienced in applying machine learning and deep learning techniques to predictive modeling, with a strong interest in growing as a Data Analyst.

EDUCATION

Bachelor's Degree in Computer Science, Taibah University | 08/2020 – 05/2025
GPA: 4.64 of 5 | Second Honor

- Core foundation in programming, data structures, algorithms, and databases, applied to data analysis.

EXPERIENCE

Data Science Bootcamp, WeCloudData & Saudi Digital Academy | 08/2026 – 09/2026

- Completed intensive, project-based training in data analysis, statistics, machine learning, and deep learning using Python.
- Applied data preparation, feature engineering, predictive modeling, and evaluation techniques to real-world datasets.

Software Development Bootcamp (Python), WeCloudData & Saudi Digital Academy | 05/2026 – 07/2026

- Completed intensive training in Python-based application development, covering backend APIs, web interfaces, and relational databases.
- Practiced building data-driven applications and collaborating in Agile teams using Git/GitHub and AI-assisted development tools.

PROJECTS

MORROW - Data Science Bootcamp, Saudi Digital Academy & WeCloudData | 08/2026 – 09/2026

- Built a retail demand forecasting framework across 1,728 time series using Python, XGBoost, LightGBM, and DeepAR to optimize replenishment decisions.
- Engineered temporal features (lags, rolling stats, promotions) and evaluated six models, achieving the lowest RMSLE of 0.4761 with DeepAR.
- Classified demand into three patterns to select the best model per pattern, and delivered actionable recommendations via Streamlit.

TikTok Video Engagement Prediction – Data Science Bootcamp In-Class Competition

- Built a leakage-safe ML pipeline to predict Day 30 video views using metadata and first-5-day engagement data.
- Engineered temporal and creator features with as-of merging and stratified 5-fold validation, preventing data leakage.
- Developed a two-stage CatBoost model, reducing CV RMSE from ~138,300 to ~102,942 and reaching 81,298 on the Kaggle public leaderboard.

FLOWIN - Software Development Bootcamp (Python), Saudi Digital Academy & WeCloudData | 05/2026 – 07/2026

- Built an admission data pipeline transforming raw applicant Excel records into a structured, decision-ready dataset.
- Developed FastAPI backend and React interfaces with role-based access control (RBAC) for applicant management and dashboard analytics.
- Applied score-based validation rules (English, technical, cheat-score) to automate Accepted / Backup / Rejected shortlist decisions.

IoT-Based IV Monitoring System (IOT-MSIIA) - Graduation Project, Taibah University | 09/2024 – 05/2025

- Developed an IoT-based IV monitoring system using Arduino, ESP8266, and Firebase for real-time tracking and alerts.
- Built an Android app integrated with Firebase to display live data, conducting a usability study with 97 participants to validate requirements.
- Achieved ~95.6% detection accuracy across 50+ trials with <5s latency, and 100% packet delivery across 20 integration tests.

CERTIFICATIONS

PCEP™ — Certified Entry-Level Python Programmer, Python Institute | 07/2026

TECHNICAL SKILLS

Data Analysis — Pandas, NumPy, Excel, OpenPyXL, Matplotlib
Analytical Methods — Data Cleaning & Validation, Feature Engineering, Time-Series Forecasting, Cross-Validation
Data & Databases — SQL, SQLite, Firebase Firestore
Machine Learning & Deep Learning — Scikit-learn, XGBoost, LightGBM, CatBoost, DeepAR, PyTorch
Programming — Python, Java
Backend — FastAPI, REST APIs, SQLAlchemy
Frontend — React, HTML, CSS, JavaScript
Tools — Git, GitHub, Docker, Streamlit
Soft Skills — Analytical Thinking, Problem Solving, Teamwork, Time Management

LANGUAGES

Arabic, English
