SUMMARY

Computer Science graduate with hands-on experience in data analysis through academic and bootcamp projects. Skilled in Python, Pandas, SQL, and Excel for cleaning, validating, and analyzing structured data to support reporting and decision-making. Experienced in applying machine learning and deep learning techniques to predictive modeling, with a strong interest in growing as a Data Analyst.

EDUCATION

Data Science Bootcamp, WeCloudData — 08/2026 – 09/2026
- Applied data analysis, machine learning, and deep learning techniques to structured datasets and predictive modeling tasks.
- Worked with Python for data preprocessing, statistical analysis, model evaluation, and predictive modeling.

Software Development Bootcamp (Python), WeCloudData — 05/2026 – 07/2026
- Processed and validated 1,500+ assessment and 1,000+ applicant records using Python, Pandas, and SQLite.
- Built FastAPI and SQLAlchemy backend services and collaborated in an Agile team using Git/GitHub for backend features and React integration.

Bachelor's Degree in Computer Science, Taibah University — 08/2020 – 05/2025
GPA: 4.64 of 5 | Second Honor
- Core foundation in programming, data structures, algorithms, and databases, applied to data analysis.

CERTIFICATES

PCEP™ – Certified Entry-Level Python Programmer — Python Institute — 07/2026

PROJECTS

MORROW - Data Science Bootcamp, Saudi Digital Academy & WeCloudData — 08/2026 – 09/2026
- Built a retail demand forecasting framework across 1,728 Store × Family time series, using Python, XGBoost, LightGBM, and DeepAR to forecast demand and support replenishment decisions.
- Engineered temporal features and evaluated six forecasting approaches on a held-out 15-day validation period, achieving the lowest overall RMSLE of 0.4761 with DeepAR and translating forecasts into replenishment recommendations through Streamlit.

TikTok Video Engagement Prediction – Data Science Bootcamp In-Class Competition
- Built an end-to-end machine learning pipeline to predict Day 30 cumulative video views using metadata, creator statistics, and engagement data from the first five days.
- Engineered temporal, engagement, and creator features with leakage-safe validation, improving CatBoost RMSE from ~138,500 to ~102,942 via a two-stage model and reaching 81,298 on the Kaggle Public LB.

FLOWIN - Software Development Bootcamp (Python), Saudi Digital Academy & WeCloudData — 05/2026 – 07/2026
- Built an admission data pipeline that transforms raw applicant records into one decision-ready dataset, from Excel imports to structured and validated data.
- Built FastAPI backend and React interfaces with role-based access control (RBAC), supporting applicant management, assessments, interviews, and dashboard analytics — integrating structured data using SQLite, Pandas, and Excel/OpenPyXL import pipelines.

Social Media Text Normalization - Natural Language Processing (NLP), Taibah University — 04/2025 – 05/2025
- Developed a text normalization pipeline using Python, Pandas, and Regular Expressions (Regex) to preprocess 10,502 English tweets for NLP applications.
- Applied text cleaning techniques including URL, mention, and hashtag replacement, abbreviation expansion, emoji conversion, and repeated-letter reduction, producing a structured dataset ready for downstream tasks such as sentiment analysis and text classification.

IoT-Based IV Monitoring System (IOT-MSIIA) - Graduation Project, Taibah University — 09/2024 – 05/2025
- Developed an IoT-based IV monitoring system using Arduino, ESP8266, and Firebase for real-time tracking of IV fluid levels.
- Built an Android application integrated with Firebase to display live data and trigger alerts and conducted a usability study with 97 participants to validate system requirements and usability.

TECHNICAL SKILLS

Data Analysis — Pandas, NumPy, Excel, OpenPyXL, Matplotlib

Data & Databases — SQL, SQLite

Machine Learning & Deep Learning — Scikit-learn, XGBoost, LightGBM, PyTorch

Programming — Python, Java

Backend — FastAPI, REST APIs, SQLAlchemy

Frontend — React, HTML, CSS, JavaScript

Tools — Git, GitHub, Docker, Streamlit

Soft Skills — Analytical Thinking, Problem Solving, Teamwork, Time Management

LANGUAGES

Arabic, English
